The 5-year Impact of P.A.T.H.S. to Adulthood: A Jockey Club Youth Enhancement Scheme

Table 1: Scale Scores of Positive Youth Development Constructs (1 = Lowest; 6 = Highest)

| | Completed Secondary 3 (School:43; No of Students: 6,733) | | | Completed Secondary 5 (School:43; No of Students:5,934) | | | The largest group difference within 5 years | | | |
|-----------------------|----------------------------------------------------------|------------|----|------------------------------------------------------------|-------------|------------|---------------------------------------------|-------------|------|-------------|
| Positive Youth | P.A.T.H.S. Non- Difference* | | , | | Difference* | P.A.T.H.S. | Non- | Difference* | Time | |
| Development | students | P.A.T.H.S. | | students | P.A.T.H.S. | | students | P.A.T.H.S. | | |
| Constructs | (Experimental | students | | (Experimental | students | | (Experimental | students | | |
| | Group) | (Control | | Group) | (Control | | Group) | (Control | | |
| | | Group) | | | Group) | | | Group) | | |
| Beliefs in the Future | 4.50 | 4.31 | 4% | 4.21 | 4.06 | 4% | 4.49 | 4.25 | 6% | Completed |
| | | | | | | | | | | Secondary 2 |
| Positive Identity | 4.46 | 4.39 | 2% | 4.45 | 4.38 | 2% | 4.46 | 4.36 | 2% | Completed |
| | | | | | | | | | | Secondary 4 |
| Prosocial Norm | 4.45 | 4.36 | 2% | 4.39 | 4.37 | 0.5% | 4.41 | 4.29 | 3% | Completed |
| | | | | | | | | | | Secondary 2 |
| Resilience | 4.71 | 4.61 | 2% | 4.65 | 4.51 | 3% | 4.65 | 4.51 | 3% | Completed |
| | | | | | | | | | | Secondary 5 |
| Life Satisfaction | 3.94 | 3.80 | 4% | 3.74 | 3.62 | 3% | 3.88 | 3.66 | 6% | Completed |
| | | | | | | | | | | Secondary 4 |
| Academic & School | 3.10 | 2.98 | 4% | 2.90 | 2.77 | 5% | 2.90 | 2.77 | 5% | Completed |
| Performance | 3.10 | 2.90 | 70 | 2.90 | 2.11 | 3 70 | 2.90 | 2.11 | | Secondary 5 |

Note: a) all differences were statistically significant; b) baseline differences between Experimental group and Control group were controlled in the analyses; c) effect size for difference was low; d) effect size in this study was better than reports of previous studies in adolescent substance abuse and delinquency prevention. * Difference = (Mean of Experimental group - Mean of Control Group) / Mean of Control Group × 100%.

Table 2: Frequency of Substance use, Smoking and Alcohol use (0 = Never; 6 = Always)

| | Completed Secondary 3 (School:43; No of Students: 6,733) | | | _ | oleted Secondar | • | The largest group difference within 5 years | | | | | |
